CAPITAL CITY LODGE, NO. 312, F. & A. M.—
Special meeting this (Tuesday) evening at
8 o'clock. Work—Second Degree. wm H. IRELAND,

The Troy Times says that the Roman Catholic clergy, having directed the faithful of the flock not to dance any more round Catholic societies in that city have eschewed the objectionable saltatory exercise, and confined the toe-tripping to "square dances." The young people do not take kindly to this, however, and an effort has been made to have this interdiction revoked. The manathat some of the young ladies declared if there were no round dances they would not attend. The clergyman bluntly refused, and, with considerable emphasis, remarked that he wished he knew the names of the young ladies in question. A large number of young woman, who have been making the required visitation of different churches in onor of the "jubilee," have been compelled to begin their visits a second time because of

National Rifle Association—The Rise in Grain, Etc.

New York, July 20 -The National Rifle Association is arranging for an inter-State rifle match in which riflemen belonging to the military organizations in different States will be contestants. It will probably take place at Creedmore in October

The sudden and unexpected increase in the export demand for wheat to European markets has given a great impetus to our grain trade. Exports this year will far exceed those of 1874. This activity is looked upon here as a sign of returning prosperity in other departments, and will probably influence a fall in the premium for gold.

Advices from all parts of the country state that crop prospects are favorable, though in the West the season is backward. The fruit market has improved, but provisions have not yet felt the force of the activity in the grain trade.

Recent numerous burglaries and assaults committed on citizens in their own houses in open daylight, and the notorious failure of the police to bring the criminals to jusice, are attracting much attention. Mrs. C. N Bremer, wife of a fifteenth ward mer-chant, No 4 Sixth avenue, was assaulted and knocked senseless and her apartments rifled yesterday. No clue has been found to

A singular story is published to-day show-ing how an aged and highly respectable New York merchant was arrested on complaint of villains who had failed to rob or blackmail him, and was imprisoned in the Tombs with the vilest criminals and subjected to the mockery of a trial and fined without being permitted a word in defense, or being al-owed to communicate with his relatives. who were well known wealthy business men

The census returns are still incomplete but from partial returns the population of New York is estimated at 1,200,000.

KILLED BY A RUFFIAN.

During the annual excursion of the Mau-ice O'Connell Association yesterday at Ex-

celsior Grove, a notorious ruffian and con-vict named Scotty Duval, with a companion, fanded at the Grove in the Staten boat and immediately began to create a disturbance among the picknlokers. Being re-monstrated with by one of the Committee named Griffin, Duval snapped a pistol at him. It missed fire and he then clubbed the pistol and struck Griffin on the head, breaking his skull and inflicting a terrible wound. Duval rowed off. Griffin will like-

The fleet will escort the Prince from Brindio through the canal to Bombay He will journey thence by land to Poona After a brief stay there he will proceed down the Malabar coast, teuching at Calicut, Bungalore, places of interest. The roya party will then sail by the Coromandel coas o Madras, and Calcutta. It is believed landing at Culon enroute, and a ten days hunt are in the program. After spending

some time in the last named cities the party will take a route through northwest India visit the cities in that region rendered famous by the part they bore in the great mu-tiny. The Prince and party touch Oudh, Allahabad. Lucknow poor, and will probably pass through Nepal. The northwest trip may in-clude a brief sojourn in the Himalaya region, with a view of some of the highest peaks of that famous range. Keeping still northwest they will enter the Punjab and traverse that province until Junmoo is reached. From this point they will take their return route through Central India southwesterly, touching Delhi and other cities, passing through the provinces of Rajpootana, Gujerat, Malwah and Candish

St. Louis, July 20 —The wife of Rev. Dr. George, of the Webster Street Presbyterian Church, being accused of immorality with a young man from Pittsburg, Pa, who was a prominent member, demanded an investiga tion. The Presbytery accordingly investiza-ted the matter and the report was read in church yesterday. The report says there is not a shadow of foundation for the charges, and recommends the punishment of the members who have been circulating the story. About thirty persons are involved.

JERSEY CITY, July 20 —A fire occurred this morning in a row of houses on Bergen Point plank road, originating in O'Rourke's liquor plank road, originating in O Roorke's inquor store. Two buildings were consumed and the inmates barely escaped in their night clothes. Loss \$10,000; insured. The fire was undoubtedly the work of an incendiary, and suspicion is attached to O Rourke. The tenants, who lost all, would have lynched him had he not been protected by the police.

CINCINNATI. July 20 —At half past 1 o'clock this morning a fire broke out in the rear of Nos. 146 and 148 West Fourth street. It originated in the fourth story of a brick build-ing occupied by William Donaldson in the lithographing business. Underneath, and extending to Fourth street, is the printing and publishing establishment of Bloch & Co. Van Loo's photograph gallery is in the second story adjoining, and a large number of interests are in the immediate vicinity.

The flames, working on the oils and light materials in the lithographic establishment, burned very stubbornly, and required floods of water to quench them.

The building is situated almost in the cen-

ter of the square, bounded by Fourth, Fifth, Race and Elm streets, and the flames gained great headway before they were discovered. The firemen were compelled to mount the roofs of the surrounding houses before their services could be made of any avail.

At 3 A. M , after the fire was apparently out, the floors all fell in, leaving, as far as we could discover in the confusion, only the bare walls standing. About the same time there was an explosion, scattering fragments of bricks and runnish in all directions.

Three men on the pavement in front of the store, on Fourth street, received slight injuries, as follows: C. W. Pettibone, follows:

wound, bled freely; Martin Gibbs, a colored. man, was badly hurt in the bresst and another man received a wound in the hand. [Special to The Evening News.] CINCINNATI, July 20 .- The fire this morning was much more disastrous than was at first supposed, the losses reaching between \$80,000 and \$100,000, but yet can not be accurately estimated. Bloch's insurance amounts to about \$30,000, and his loss will

exceed that amount by siderable. Donaldson estimates loss at \$37,000. Insured for \$21,000. Trounstine, who owned the building, puts his loss at \$10,000; fully insured.

J. C. Boyd, at 150 Fourth street, puts his toss at \$1.500; insurance. \$2.200 Holcomb was killed and Chief Megrew and ten firemen injured. McCormack, one of the injured, is thought to be dying Chief Megrew lay an hour and a half under the debris, and is badly, but it is hoped not fatally, injured. At noon he is resting easier. He is badly cut in the face and braised about the body and one leg is broken. Henry Hambrock suffered a broken arm and bruises; Joseph Chuck, injuries slight; James McCormack, fatally injured internally; John Pohlman, head and internal injuries; Lee Slocum,

badly burned about the head and chest and arm broken Daniel Cronin and Edward Spencer sustained only slight injuries.

The fire this morning commenced in the lithograph establishment of W. H. Donaldson, 146 West Fourth street. The flames spread quickly and Donaldson's stock was completely destroyed; also Bloch & Co.'s, the Israelite office, and VanLos's photographic establishment. The firemen worked heroically, and just as the fire was under control the walls fell, burying the Chief of the Fire Department, McGrew, and seven firemen in bepartment, McGrew, and seven bremen in the debris. The fall was caused by an explosion of gas. E. A. Spencer and Henry Schulmeyer were thrown by the wall from the top of a six-story ladder but not dangerously injured; James of Rodine McCormick was first rescued from the ruins. badly burned. Dennis Cronin and Hopleman were both rescued alive but terri-bly hurt. John Fleming and Joe Chuck were less severely injured. Chief McGrew was rescued last, after superhuman efforts by the firemen. His thigh was broken and he was otherwise severely injured. John Holcomb was crushed to death. The

loss was \$25 000; insured.
Another fire at the same time burned Jasper's distillery at Covington with 400 barrels whisky and 20,000 bushels of malt. Loss,

\$50,000; insurance, \$25,000. Probabilities To-Day.

THE School Board are cogitating over a ocation for the library. Is there any particular hurry about this? THE accountants have found the extent of the Louisville revenue defalcations to be \$82,900, nearly twice as much as was suspected. This is a singular case. Jackson, the defaulting deputy, who is dead by his own hand, was a moral man who had always borne a high reputation. 'set our coulter too deep," in beginning a system of sewage as extensive and expensive as ours, in a city so ill adapted by diffused settlement, for that or any other improvement that costs by the linear foot and costs as much where it can do nothing as where it can do service. Unless forced by sanitary necessities, the longer these expenses are deferred, by a rapidly growing town, the better for two obvious reasons. As the town grows and thickens up, each foot of its streets is put more and more in a condition to be benefitted to an extent corresponding to the outlay on account of it. When every lot has its house along an ayenue like Kentucky, there is sure service to more persons and residences than there could be if the avenues were, as Kentucky really is, a ragged streak of cabins and common from Maryland to South, and of saloon and cemetery-an ominous junction-the rest of the way. But there is not less service done where such costly works are constructed on such plans, but there is less ability to pay for them. A street with half of the lots vaeant is not only but half benefitted to a sewer, but it is only half able to pay. Property is worth less, and is less productive under taxation. These considerations did not receive due weight in undertaking our sewage system, and we have got into it at an ugly expense with the calamity of not getting out of it except at a good dead nore. A little delay would have made the city better able to pay, and given us ess blank ground to improve at the same cost as better. But still there was was the argument for the work that we must have t sometime, and could never do it cheaper. and were practically out of debt. If the work had been prudently con-

lucted we might have lifted our deep set olough a little and pulled it through more easily, but it has not been properly conlucted. The work has been well done: the contractor has kept faith fully; but for nuch of the work there was no urgent need; or it was needed where it was not lone. The Shelby street sewer is a monstrous blunder, made as it is, along property that does not lie in the city and can't be charged with the tax to pay for it. And, worse still, it lies along property that has not, on one side, a single residence or house of any kind from one end to the other. A sewer might as well have been ouilt in McCarty's "bottom." And while \$16,000 is wasted in the utterly idle job. North Pennsylvania street, lined with ostly residences is left to be flooded with every rain, and a suit for damages provided against the city. Was ever such blind waste and blind saving seen before? A company of idiots out of "weak-'minded school" could not have done worse. There is no such astounding fool as your man of ordinary sense led into jobs ed" liquors and wines than can be made in y party or personal influence. He plays tricks that would keep the angels crying as constantly as Tice's equinoxes keep it raining. Now, by way of finish to this He was on the high road to success when folly, there is an ordinance pending to carry on the Washington street sewer to New Jersey street. From Illinois to Pennsylvania, the excavation for it was a huge well, drained at the rate of five hundred gallons a minute to get it low enough for work. At Pennsylvania vear has been an unintermittent rain storm. There is more water in the sand stratum under the city, both by stream and surface soakage, than there has been in a life time. A sewer ditch would, in all probability, sink into four feet of water at Pennsylvania, and a good deal more between Alabama and New Jersey. In such a depth no safe cement work could be done, and no honest contractor would undertake to do it. except at an expense that it would be treble folly to incur when it could be avoided by waiting awhile for a dryer season. It would be wise, too, to wait till our debt is reduced a few hundreds of thousands of dollars before making more.

Baptized by Mistake. New York Weekly.

Some of our worthy colored brethren of the Baptist persuasion had a baptism down at the creek last Sunday, and the ceremony attracted a very large crowd of people. Pitman's colored servant girl was very anxbuild permanent quarters of the right lous to be present, and, as it was not her Sunday out, she slipped away from the house while the dinner was cooking, and went around in her working clothes. Her interest was so intense that she stood close to the minister, who was in the water, while the ceremony proceeded After six or seven had been dipped, the clergyman, filled enthusiasm, seized her and pulled her into the water. She resisted, but the minister imagined that she was merely afraid of the coldness of the water, so before she could ex-plain the situation he soused her. She ame up spluttering, and exclaimed

What you doin'? Lemme go, I tell you!' But he exerted his strength, and sent her 'ker-chuck" below the surface again. She nerged, clawing the air wildly and shout-

G'way from here! Don't you chuck me under agin, you nigger!'

But the clergyman was inexorable, and he plunged her under a third time, and he held her there for a minute, so as to let it soak in and do her good. Then she came up and struck for the shore, and standing to looking like a draggled mermaid cut in

But this passage appears to have given trouble to French translators, and the writer in question propounds as a solution of the difficulty that the old gentleman in calling his daughter a green girl compares her to a girl who sells greens.

Miss Nolia Bonner, operator at Fisher's Station, Hamilton county, was receiving her portion of ice from the train when a few small pieces fell upon the ground, She stooped to gather them up, when the ice man thinking she had stepped aside, rolled out a big chunk of ice which, striking her on the back, flattened her to the ground, partially under the car, from which position she escaped just in time to avoid being crushed by the moving train.

During the progress of a funeral at Oil Creek Chapel, Perry county, the other day, a fierce rain storm came on, and the little church, which is situated on a knoll, in the midst of very low land, was soon surrounded by water, which continued to rise until it reached the floor. The horses hitched to the trees in the vicinity had to be swum to higher ground, and there was danger that the church itself, with the minister, corpse and congregation, would be swept away. After a delay of four hours, however, the water subsided sufficiently to allow all to escape by fording.

vessel will be an engine of twelve-horse power, which will set in motion the wings or sails on each side of the vessel. The propellers will be constructed on the same principal as windmills. The machine can be so placed that both protion, or one may pull and the other push. Upon the ascension of the balloon the propeller in front is placed in motion; after ing at the hight desired, the screws are set to work, and the vessel follows the direction given it by the pilot. The vessel is likewise provided with two blades, which move simultaneously, but turn in opposite directions. A gas machine will be attached to the balloon to supply the necessary gas during the voyage. In case of a leak in the balloon other smaller balloons, filled with gas, will always be on hand, and when placed in the larger one will serve to stop the lea age, The contract for the construction of the baltoon has already been given out, and the work is to be completed August 5.

Mr. Schroeder expects to be able to make a voyage in this balloon from Bultimore to New York in one and a half-hours, when the wind is favorable. The voyage by the calloon from New York to Londo made in fifty hours. Mr Schroeder states that if he is intrusted with the carrying of postal matter to Europe he can complete the route from New York to Hamburg, Paris, Lisbon and Washington in the space of signays. The whole vessel will weigh 2,800 pounds, and it it thought that in addition to the carriage of postal matter, fourteen pas-sengers can be transported in it.

Power of the City Over Parks.

In view of the effort of Park Commissioner Perkins to debar the Y. M. C. A. from Military Park, first trying force and second that the Council should suppress the meetings, the following opinion from the City Attor ney, on whom he counted to back him, will be found interesting. The Attorney takes the same ground assumed by Mayor Caven and The News, and holds that upon neither Circle nor Military Park can the city exerc'se more than a general police control.

"By specification 11 of section 2 of an act pre-scribing the dut es and powers of the Auditor of By specimental of section 2 of a set property of seribing the dutes and powers of the auditor of state." It is made his duty "to keep and preserve all property of any description belonging to or appertial ing to his office, and also to the State, where no other prevision is made by law for the safe keepins of the same." It G. & t. p. 119. It am not able to find any set or resolution of the Legislature making a y special powision in regard to silitary Park, or contemplating, expressly or by inference, any such office as "C mmissioner of Military Park." Unless some such act or resolution on exists, then the state auditor has the general custody of the park. It may be conceded that the city has a general police power over the park in so far as to authorize it to prevent the gathering of any assembly or the doing of any act therein detrimental to the comfort, hesith, good order and general welfar of the imbabitants of the city. But it must also be conceded that the police power of must also be conceded that the police power of the city is not se extensive, as applied to the park, as it is over the streets, alleys and side walks of the as it is over the streets, alleys and side walks of the city. It may prevent the congregation in them of assemblies otherwise lawful upon the sole ground that they obstruct travel upon them, but it cannot up in this ground forbid such assemble in the pick. If the State Auditor chooses to permit persons to assemble in the park, and they do so assemble and conduct their selves dee utly and otherwise lawfully, the city has no power to prevent their so doing. It think the tity Council has no power to pass the motion as framed, and, if passpower to pass the motion as framed, a ed, I do not t ink the Courts would enf

The Wabash and Eric Canal.

To the Editor of The Evening News. Just having read your article in regard to he judicial proceedings looking to the sale of the Wabash and Erie Canal, I can not retrain from expressing my humble opinion that the people of this State have been and are acting with an astounding degree of stupidity and a lack of State pride which is totally incomprehensible, in permitting this great public thoroughfare—the only means of free and cheap transportation in the State -to pass from under their control into the hands of private parties, who will destroy it s a means of transportation altogether, otherwise manage it in a manner adverse to the public interests, as surely as such a dis-position is consummated. Why has the position is consummated. State not been represented in these proceedngs? The people throughout the entire ding in the districts along the line of the canal may have a more immediate and dicanal may have a more immediate and di-cect interest, it will be found that the entire State will be deeply affected by such a disposition of this great public thorough-fare. This could easily be shown to be true, but it is probably too late for any further ar-gument. Would not the destruction of the New York & Eric canal, or suffering it to pass into the hands of private parties and competing railways, affect the interests of the people of the State of New York, and of the entire Northwest, and increase the rates of ansportation of grain etc., to the seaboard so, and even more so will it be in the fu ture, and is even now, in this State, in regard to the Wabash & Erie canal, which may be said to be almost a part of the former, as boats laden with freight are frequently towed across the lake from the one to the other at Sinker's foundry, was appointed to the and desirable portion of this same canal vacancy on the police force caused by Kopke's forced resignation. A. Thieme is an jealous care, and is reproaching us, and it would not be healthy for any man in public been taken in this State with reference to parts of these same premises. And the time will come when the stupidity, or

position in that State, or in the State of New York, to take such grounds as have worse, which has led to the present condition and prospective disposition to be made of our portion of this great thoroughfare will be deprecated sorely enough. It seems how ever, as if it would be but another example wherein the people, having been taught in the school of experience, learned only when t was too late.

And, in conclusion, permit me to say I reside in this city, and expect never to reside elsewhere; have no interest whatever, and never have had any, either directly or indirectly, in any bond or other obligation of the State, or relation to any one that has ad; am more than an average tax-payer; and as an alternative, if necessary, (which I do not believe,) rather than witness the de struction of this canal, or have it to pass under the control of private parties and com peting railways, I would willingly pay double my proportion of all the alleged indebtedness of the State, and be sure of being richer in the end for having done so. And the same would, in my opinion, be equally true of the people of the State at large, wherefore it seems to me that the Governor should give some earnest attention to this subject. The skillful and successful manipulation of these matters in the interests of the people would insure their gratitude, and

be fame for any man. NATIVE HOOSIER, P. S. Has it been carefully examined into to know if the matter were contested, whether these cestui que trusts have a right, under the contract, or deed of trust, by

Chiefly because we have no Vagrant Act worth applying to them. There is a city ordinance which in extreme cases can be twisted into service, when no other charges car be made to stick, but that only sends tourists. Tickets will be on sale at Union Depot the vagrant to the country to ply his avocations for a few weeks and return. The whole country is full of thieves who are ready to route, address C. J. BRACKEBUSH, Manager, 70 country is full of thieves who are ready to add violence even unto death, if necessary, for the accomplishment of their purpos four-fifths of whom might be arrested and punished in advance of overt acts of felony, f we had a State law which would properly punish vagrancy. Able-bodies men, young men well dressed demand entertaiment often by threats when they find the men-folks too far from the house to render assistance to the women. And for all this there is no penalty provided by law. Should the man of the house happen in upon the thief while thus imposing upon his family he has no re-dress but to shoot the felon, and for any personal violence he may offer the gentle he is held to a strict account by the laws the land. The vagabond is protected for want of law to punish him, while the honest man is restrained from protecting his family and property by the laws against personal violence. Other States are enacting laws for punishing vagrancy. A new law not yet six months old in Massachusetts months old in alassachusetts has in some towns almost wholly abolished it, while in others it has re-duced it from an average of about sixty applications per week to from four The substance of the law is that able-hodied men applying to station houses or town of-ficers for relief, shall be relieved, but they

What Is It For?

To the Editor of The Evening News Some people in the northeastern part of the city would like to know if the lamp post, at the corner of Butler street and Parl post, at the corner of Butler street and Park avenue, was put up for the special purpose of affording a good place for the watchman to arouse the echoes? (as well as the people) The gas upon this post being never lighted, or if lighted extinguished in a very short time, gives rise to the query, What is a gas post for? It is a dark question; let us have light.

The clay is found at a depth of over 100 feet' and below this is also a productive strata of iron. Lawrence county is the only locality in the United States where this clay is known to abound, and when it is in buying fine jewelry, diamonds, watches, considered that millions of dellers worth of land, the importance of the discovery is at once apparent. The mine is situated in the southwest part of the county, and is distant fourteen miles from Bedford.

The Kaufman Trial.

The Moritz Kaufman case, which has resulted once before in conviction in the Criminal Court, and secured a new trial by some echnicality from the Supreme Court, taken up again yesterday afternoon, Judge Chapman presiding, and is now on trial by ury. The first witness, Captain Kelly, was placed on the stand this forenoon, and notwithstanding a rigid questioning by defend-ant's counsel, Major Gordon, held his own bravely. He was followed by Samuel Clarke, both testifying to a straight tracing of the Parker, Hanway et al.'s hogs from the pasture to Kaufman's pens, and giving an elaborate description of the facts coming to their knowledge. The trial will last several days, judging by the present symptoms.

The accident was the result of his own carelessness.

Mtxed.

Among the many ways devised by old topers to get their usual allowance of spirits since the enforcement of the Sunday law in this city is that of having their physician make out a prescription for them, in which an inventory of the business of the country decidedly the largest ingredient shall be brandy or some other stimulant. A Southside druggist filled such a prescription Sunday, the spirits predominating in the proportion of one pint of brandy to four grains incture of iron. Hardly a distasteful mix-

Greatest Invention

WHAT GOVERNOR HOWARD, OF R. I., SAYS: PHENIX, R. I, March 27, 1875.

GENTLEMEN—We have now had the Type-Writer about a month, and are entirely satisfied with it.

There can be no doubt in regard to its usefulness. When I saw the advertisement of the machine originally, I had little faith in it. An examination surprised me, but not so much as the practical working has. We have no trouble whatever in working it, and it is almost constantly in operation. I think that it must rank among the great inventions of the century.

Very truly yours,

HENRY HOWARD,

The Business Failures of Six Months The semi-annual circular of R. G. Dun &

Co., a mercantile agency of such extensive correspondence that its reports are virtually states that the number of failures in the first six months of this year to have been 3,337 out of a total of 658,000 firms represent ed to the agency; total liabilities of the fail-ing firms \$75,000,000. Two facts are here indicated by comparison with previous years, viz: the number of failures is noticeably larger, while aggregate liabilities are less. This shows that the depression in business has begun to affect the smaller firms. in 1873 the average liabilities for each failure were about \$44,000, in 1874 about \$26,000, and in 1875 about \$22,000. The failures in England during the past three months have aggregated far more than here in the past six, the liabilities of the firms which have failed in London, Leeds and Manchester alone during that time amounting to over \$100,000,000, while in Canada there have been 800 failures with liabilities of over \$12,000,000. The circular says little money is now being made in trade, and thinks that the expense of business and the cost of living have not declined proportionately to the decline in prices, while production still con-tinues in excess of demand. The circular The circular concludes in a hopeful vein as to prospects for the coming year.

32 North Pennsylvania street, opposite Post Office ject, said Mr. Dowling, is to wind up the trust, sell the property, and divide the pro-ceeds among the canal stockholders. The sale will, of course, include the bed of the canal, with its water power, locks, its unsold lots and lands, some of which are very val-uable. The effect will be to destroy the canal entirely, unless a company can be organized to purchase the property and put it in repair. It would seem that in view of the absorbing interest in the problem of cheap transportation, and the power vested in the counties along the line to vote appropriations in aid of the canal, that an opportunity is now presented to put this great water line upon a substantial footing. Its great value to the State is conceded.

The Northern Pacific Railroad.

This road, with all its property and franchises, is to be sold at auction under decree of Court, August 2d, in New York City, for the benefit of the first mortgage bond holders.

The general body of bondholders have united in a plan for protecting their interests, by causing the road and property to be bid in for them by a Bondholders' Committee, selected for the purpose. This committee consists of Johnston Livingston, of New York; Frederick Billings, of Vermont; Geo. Stark, of Massachusetts; J. K. Moorhead and J. N. Hutchinson, of Pennsylvania; and John M. Denison, of Maryland. The plan purchase and reorganization represented by this committee has been unanimously approved by a general meeting of the bond holders. All bondholders, who wish to share in the benefits of the plan or desire information, should immediately address the Purchasing Committee, N. P. R. R., at 23 Fifth avenue, New York.

The Usual Method.

[Cincinna!i Commercial.] The first thing, when your Little Mike proceeds to mend a street, he removes the bowlders and digs out the gravel for several Pure Turkish Emery, inches in depth. This is thrown into carts and removed, thus giving employment to carts. Now, your carts are always owned by The new gravel provided from the reshest city pile is then thrown in and the bowlders are hammered (not strenuously, but leisurely,) into place, and three or four inches of fresh gravel and sand spread over them. The covering wears off in a few weeks, becomes dirt, falls into the hands of the Street Cleaning Department, and the bowlders being exposed are speedily loosened, and the street is ready for another job for carts, gravel and pavers.
